For 8909 Licensee Only

8909 QDCM Mobile 3.0 Release Announcement:

QDCM (Qualcomm Display Color Management) Mobile 3.0 is an on-device display color tuning tool that supports **8909** chipset. Supported features are:

1. Color Temperature Adjustment

2. Picture Adjustments
   a. Hue
   b. Saturation
   c. Intensity
   d. Contrast

3. "Restore Settings" for returning to predefined factory mode (no adjustments).

4. "Save" button for saving the current display setting as a default setting that will be preserved and store it to a file.   The file (/persist/pp_calib_data.bin) can then be pulled out and used for propagating the setting to other devices.

5. "Cancel" button for restoring last saved default setting.

APK package for QDCM Mobile 3.0 is available as a part of build release, in below location:

`/out/target/product/msm8909/system/app/QDCMMobileApp/QDCMMobileApp.apk`

Reference APK source for QDCM Mobile 3.0 is available here:

`/vendor/qcom/proprietary/snapdragon-sdk/display/qdcm_mobile`

QDCM Mobile 3.0 User Guide is available at CreatePoint with the following DCN:

1	*QDCM MOBILE 3.0 ON-TARGET DISPLAY COLOR TUNING TOOL USER GUIDE*	80-NV054-1	Feb. 26, 2

Thanks,
Oscar Xu
